### **TREK RECALLS 1994 MODELS DUE TO BOTTOM BRACKET PROBLEM**

Waterloo, WI (October 4, 1994)--Effective immediately, Trek USA is announcing a voluntary recall regarding a potentially serious problem with bottom bracket spindles found on various Trek 1994 models.

The following 1994 Trek models are affected:

2200  
7000  
7000 SHX  
7300  
7600  
7900  
8000  
8700

The parts are bottom bracket spindles manufactured by K.S.S. Specifically, the concerns are for the "TLS" and "TLS Super" bottom brackets.

Trek is requesting that all sales and shipment of both the bicycle models and aftermarket items listed be discontinued.

Dealers are requested to:

1. Discontinue sales and distribution of the aforementioned bicycle models.
2. Immediately inform and discontinue operation of the affected models already in the hands of the customer.

Trek has voluntarily advised the Consumer Product Safety Commission of our concerns.
