

What is different about the frame compared to previous versions?

New Roscoe gets a lot rowdier with these frame updates:

Geometry – Longer reach (about 45 mm more, depending on size), slacker 65-degree head angle, steeper 74.7-degree seat tube angle and 430 mm stays.

Fork travel – New Roscoe has 140 mm of front suspension on all sizes.

Other rad features – Boost 148 rear thru axle, more dropper insertion, noise-reducing downtube and chainstay armour, ISCG 05 mount, improved internal routing and UDH (universal derailleur hanger – so hot right now)

*Roscoe 6 provides amazing value by utilising a carry-forward frame

Do any frame sizes feature curved top tubes for lower standover?

All sizes have straight top tubes. The longer reach allows a more gradual angle that results in a lower standover on all sizes compared to previous Roscoe.

Do all frame sizes use the same wheel size?

Most sizes use 29" wheels, but the XS has 27.5" wheels for the best fit.

What is the maximum tyre size?

29x2.6" (XS: 27.5x2.6")

Is it compatible with other wheel/tyre sizes?

No.

How much dropper post insertion does the frame have?

XS – 235 mm

S – 240 mm

M – 255 mm

ML – 260 mm

L – 280 mm

XL – 328 mm

What type of bottom bracket does it use?

BSA 73 (threaded)

Is it compatible with cranks with 30 mm spindles?

Yes, with compatible BB.

What is the maximum chain ring size? Minimum chain ring size?

Maximum: 52 mm chain line – 32T; 55 mm chain line – 34T

Minimum: 52/55 mm chain line – 28T

Are these bikes tubeless-compatible? What additional parts are required?

Yes! The Roscoe 7, 8 and 9 all come with a complete tubeless set-up, including rim strips, valves and sealant.

Does it have any accessory mounts (kickstand, racks, mudguards, lights)?

It has ISCG 05 mounts for a chain guide or bash guard and none of that other stuff, because the Roscoe just wants to rip singletrack. The Roscoe 9 even comes with an upper chain guide.

What is the maximum fork travel?

The Roscoe can handle up to 150 mm of fork travel... but can you?

Is it compatible with 2x drivetrains?

No.

Which version of Knock Block does it use?

None of them.

Are all sizes compatible with a water bottle?

Yes!

What is the rear brake mount? What is the max rotor size?

160 mm direct mount on all sizes. Adaptable to 180 mm

What is the hub spacing?

Boost110 front, Boost 148 rear.
