

## MY22 Top Fuel FAQ

### **What is different about the frame than previous versions?**

The 2022 Top Fuel leans further into the Trail category with an extra 5 mm of travel in the rear for a more balanced 120 mm front and rear travel.

Geometry changes include a slacker head angle (from 67.5 to 66), steeper seat tube angle (from 75 to 76) and longer reach (about 10 mm, depending on frame size).

All models, even alloy, now come with internal storage in the downtube. All models also have bigger 34.9 mm seat tubes to accommodate more robust dropper posts. Also, mechanics will love the fully guided internal routing through the front triangle.

Top Fuel also fits more riders with a new XS size with proportional 27.5" wheels. Only available on the 9.7 model for 2022.

### **Which version of Knock Block does it use?**

2022 Top Fuel uses Knock Block 2.0 that gives you a 72-degree turning radius or the option to remove it.

### **Do any frame sizes feature curved top tubes for lower standover?**

The sizes XS and S do have a slight curve in the top tube.

### **Are all sizes compatible with a water bottle?**

Yes! The S works best with a 591 ml (20 oz) bottle. The XS is only compatible with the 444 ml (15 oz) Bontrager bottle.

### **Do all frame sizes use the same wheel size?**

Sizes S and up use the fastest-rolling 29-inch wheels. Size XS uses 27.5 wheels for better fit and handling.

### **What is the maximum tyre size?**

29x2.5" (27.5x2.5" on XS)

### **Is it compatible with other wheel/tyre sizes?**

No, we do not recommend changing wheel sizes.

### **How much dropper post insertion does the frame have?**

XS – 205 mm; S – 245 mm; M – 270 mm; ML – 285 mm; L – 300 mm; XL – 320 mm

### **What type of bottom bracket does it use?**

73 mm BSA threaded

**Is it compatible with cranks with 30 mm spindles?**

Yes, with correct BB.

**What chain line is it designed for?**

New Top Fuel is designed around a 55 mm CL

**What is the maximum chainring size? Minimum chain ring size?**

Maximum – 36T (oval rings – 34T); minimum – 28T

**Are these bikes tubeless-compatible?**

Yes! All models come with a complete tubeless system including valves, strips and sealant.

**Does it have any accessory mounts (kickstand, racks, mudguards, lights)?**

No, it does not. It has a really neat storage door, though.

**What is the maximum fork axle-to-crown and/or travel?**

130 mm max travel, which is typically 522 mm max axle-to-crown on XS with 27.5" fork and 541 mm max axle-to-crown on S-XXL with 29" fork.

**In which Mino Link position is the bike dispatched?**

Low. Also note the new placement of the Mino Link at the bottom shock mounting bolt.

**What size hardware is required for aftermarket shocks?**

M10x1.0 upper (trunnion), M8x1.25 x 30 mm length lower

**Which aftermarket shocks are compatible?**

We know the following fit:

RockShox: Deluxe, Super Deluxe, SID Luxe

Fox: Float DPS, DPX2, Float X

Others should be checked for clearance at full travel.

**Does it have ISCG mounts?**

Yes, it has 2 ISCG 05 mounts

**What is the rear brake mount? What is the max rotor size?**

160 mm direct post mount, adaptable to 180 mm
